

"Our Moon"

SoVerA VP Donna Monahan will be talking about how the moon came into being, why it looks as it does now, what you can see on the moon from Earth and all about its craters, its eclipses and the tides.

This presentation is rated FCG, for Fun, Curious, General audiences and will be held rain or (star)-shine.

***Tuesday, 9 December,
7:00 PM
Whiting Library,
Chester, VT***

The Southern Vermont Astronomy Group (**SoVerA**) holds Public Astronomy Meetings on the 2nd Tuesday of each month at 7pm. ***PLEASE NOTE: This event may be televised.***

If the sky cooperates, we'll have binoculars and telescopes set up afterwards so you can see planets and deep sky objects. More info at: 802 875-6464, and www.sovera.org
