

# *Astrophotography*

Astrophotographer Al Takeda will show some of his most recent high resolution astrophotos of deep space objects taken using his 7-inch, Hyperbolic Astrograph which produces wide field (3 degree) images of the night sky. He will discuss recent advances in his astrophotography techniques and methods and talk about new developments since his last visit to SoVerA.

***When: Tuesday, 9 February, 7:00 PM***

***Where: Whiting Library, Chester, VT***

***Free + Open to the Public***
